Profile

After joining the film industry as an art department assistant last year, I am looking for my next job in a film or television art department, to push the skills I've learnt further.

As an enthusiastic creative, I am driven to achieve my ultimate goal of becoming a production designer. I consistently approach briefs methodically, making informed yet creative judgements which ensure any outcome produced is accurate and of a high quality.

This I believe, alongside my ability to thrive under pressure (whether in a team or solo), will enable me to succeed in this industry.
